

Summary

I am a beginner programmer with a good understanding of Java and web development. I am comfortable working with HTML, CSS, and JavaScript to build websites. I enjoy learning new programming concepts and improving my skills through hands-on practice. I'm eager to grow and take on new challenges in programming and web development.

Projects

Book Buddies is an engaging book review website where readers can share their thoughts, rate books, and explore recommendations. Users can browse books across various genres, connect with a community of book lovers, and discover their next favorite read. Whether you're into thrillers, romance, or mysteries, Book Buddies makes it easy to find and discuss books you love!

Quiz Application System is an interactive website designed to help users practice and improve their C programming skills. It features quizzes on topics like syntax, loops, and functions, providing instant feedback and progress tracking. Ideal for learners at all levels, it's the perfect platform to master C programming through engaging practice!
